1 Freeze matched representations

Six facts; same sentence order

g = 1	f1	f2	f3	f4	f5	f6
g = 2	f1 | f2		f3 | f4		f5 | f6	
g = 3	f1 | f2 | f3			f4 | f5 | f6		

2 Reveal target, then edit a fresh clone

Sample two targets after grouping freeze
Each starts from the same initial state

Full memory + update evidence visible
No gold unit ID or edit span supplied

3 Two separately analyzed case batches

Baseline: g = 1/2 x Global/Select + g = 2 Patch

20 cases; 600 calls + 1,200 instruction-paraphrase calls

New batch: g = 1/2/3 x Select/Patch; 20 cases, 720 calls

4 Execute and evaluate

Apply proposed edit; no gold repair
Select/Patch: copy untouched text

Strict success + failure components
Tokens and generation latency
